MEASURE: Create a report for any neighborhood to assess both the available pathways to opportunity and the outcomes of opportunity at the census tract level.

LISTEN: Hear from community members who share what’s working and what’s not, and gain their personalized insights on important local issues and how to take action.

PARTNER: Partner with food, health, housing, job training and education programs in neighborhoods across the country.

EVALUATE: Assess the metrics that matter – understand, benchmark and monitor opportunity to drive better decision-making within each unique community.

TOOLS FOR COLLABORATION: MEASUREUP

MeasureUp
Welcome to MeasureUp, a microsite of resources and tools to help you measure and describe your programs' impact on families and communities and on factors related to health. MeasureUp provides examples, tools, and resources to help you make your case, without having to become an economist.

You can dip your toe into the topic or dive deep. You can learn about how to map issues in your community or see how other groups are measuring impact and the tools they use. Read stories about communities that have used health metrics in community development work. And if you want to design your own study, you can do that too. If you need to make your case to a funder or policymaker, read about the evidence for a link between health and community.

Here's what's available:

- Mapping Tools: Learn how to map your community's strengths and target areas.
- Measurement Tools: See how others are measuring health-related impact and find resources to help you get started.
- Evidence Base: Learn more about the effects of neighborhood on health.
- Measurement Stories: Read and watch stories from the field about measurement in action.
- Deeper Dive: Want more? Go deeper with these ideas and innovations.
